Ammunition Data Sheet

10mm 180 grain FMJ

Team Never Quit (TNQ)'s Training line offers a couple different calibers in FMJ configuration. This 10mm Auto 180 gr product utilizes a FMJ lead core bullet. It is ideal for plinking and range operations for this caliber.

Team Never Quit™ is about quality products the customer can count on every time. Marcus Luttrell and his team play a key role in the production process, personally firing rounds out of each LOT of ammunition to evaluate overall quality and accuracy of the products. The ammunition line leverages Luttrell's operational elite military experience to focus on a tactical array of products built for match grade performance, self-defense, and the absolute best in serious training.

Physical Description

- **Bullet: 180 grain Full Metal Jacket Projectile**
- **Primer: O.E.M. Primer**
