

# TEAM NEVER QUIT

AMMUNITION

## Team Never Quit – 223 NXG 45 Gr Lead Free Specs NOTE: NOT FRANGIBLE

Team Never Quit 223 45 gr NXG round utilizes the Sinterfire Next Generation of lead-free projectiles. This new patent pending technology allows for the first time lead free ammunition to compete at standard prices to standard FMJ lead core ammunition.

NXG rounds are designed for target shooting, plinking, training, varmint control, and competition in indoor and outdoor shooting environments. The projectiles are rugged enough for the toughest chambers and are easier on targets. Clean up your range in a snap! The bullets are 100% recyclable.

While NXG projectiles are NOT frangible, they are extremely easy on your trap and do not bounce like conventional copper bullets. The round performs like standard FMJ ammunition in accuracy and terminal performance while meeting the standard of a true lead free projectile.

100% copper satisfying the requirements of ranges and habitats world wide.

### PRICE – PERFORMANCE – LEAD FREE - NXG
